

Qualified Native American Tribal 8(a) businesses are uniquely positioned to secure significant contracting opportunities with both the Department of Defense (DoD) and other federal and civilian agencies. Thanks to the revisions of Section 811 of the National Defense Authorization Act (NDAA), these businesses can be awarded sole-source contracts with elevated thresholds:

- Up to \$100 million for DoD contracts: This substantial threshold allows Tribal 8(a) businesses to secure large-scale contracts without the need for a Justification and Approval (J&A) process.
- Up to \$25 million for federal and civilian agency contracts: Similarly, this provision extends significant contracting opportunities in other sectors, streamlining the process by eliminating the J&A requirement.

This legislative revision underscores the government's commitment to supporting Native American Tribal businesses, enhancing their competitive edge in the federal contracting landscape.

Hi, We are Innovators

We innovate to better human lives. Our ingenious technology solutions enable government agencies to fulfill their mission..

Customer Centric Digital Innovation

KAIVA ARCH CAPABILITIES & EXPERTISE

CYBEROPERATIONS

Enterprise Management & Planning

- Program & Project Management
- Gap Assessment & Process Monitoring
- Continuity of Operations

- Where an acquisition exceeds the competitive threshold (\$4M), the SBA may accept the requirement for a sole source 8(a) award if the SBA accepts the requirement on behalf of a concern owned by an Indian tribe or Alaska Native Corporation.

AWARD PROCESS

AGENCY PROGRAM MANAGER

- Establishes Requirement
- Prepares SOW & Procurement Request
- Identifies 8(a) Firm - Market Research

BUDGET OFFICER

- Authorizes Funding

CONTRACTING OFFICER

- Identifies 8(a) Firm as the most capable
- Offers the requirement to the SBA for the 8(a) Firm

SBA

- Accepts requirements on behalf of the 8(a) Firm
- Authorizes agency to conduct negotiations with 8(a) Firm

CONTRACTING OFFICER

- Issues RFP to the 8(a) Firm

8(a) FIRM

- Submits technical and cost proposal to the Contracting Officer in response to the RFP

CONTRACTING OFFICER

- Performs technical and price analysis

8(a) FIRM

- Negotiates final price and deliverables with the Contracting Officer

CONTRACTING AWARD

- Contracting Officer assembles contract and forwards to SBA
- Government Agency, SBA and 8(a) Firm executes contract

Past Performance FAR

FAR 15.305(2)(iii)

Past Performance information is one indicator of an offeror's ability to perform the contract successfully. The solicitation provides offerors an opportunity to identify past or current contracts relevant to the requirement and evaluate problems encountered on the identified contracts and the offeror's corrective actions.

Past Performances

Internal Revenue Service (IRS) Application Development Data Delivery Services (AD:DDS) Division Security Engineering Support

The Data Delivery Services (DDS) branch of the Internal Revenue Service's Application Development division contracted with Kaiva Tech* to ensure the integration of adequate security and privacy protections into its application development lifecycle. The DDS branch is responsible for development activities associated with the IRS' most critical IT assets.

Therefore, secure development and delivery of these systems is of critical importance to ensuring the success of the IRS' mission. Kaiva Tech provided the up-front security engineering and privacy impact analysis support to DDS ensuring that critical IRS systems were developed with adequate security and privacy controls integrated throughout the system development lifecycle in accordance with Office of Management and Budget (OMB), Department of Treasury, and IRS policy requirements.

KPMG NIST SP 800-171 Compliance Assessment & Controlled Unclassified Information Protection Program Implementation

The top rated "Big 4" accounting firm KPMG, LLP engaged Kaiva Tech to complete an assessment of their global information systems for compliance with NIST Special Publication 800-171, Protecting Controlled Unclassified Information in Nonfederal Systems and Organizations, within 9 months to meet their expedited compliance deadline. Major components of this effort included leveraging our firm's expertise in NIST compliance to interpret and translate the 800-171 controls into understandable terms and, where possible, relating them to KPMG's existing security architecture to meet compliance requirements; developing system security plans documenting control implementation; developing assessment plans and executing controls assessments; documenting assessment findings in security assessment reports; and developing plans of action and milestones for finding mitigation. Further, our scope also included the development of a risk-based continuous compliance program which enabled the Firm's leadership to make informed decisions regarding how to respond to threats to the CUI data processed by its information systems.

USSOUTHCOM Security Support Services

Kaiva Tech's team supports USSOUTHCOM's mission by developing, implementing, and overseeing security management programs within the headquarters (HQ) and throughout USSOUTHCOM's area of responsibility (AOR); which includes Central and South America, the Caribbean, and the adjacent waters of the Pacific and Atlantic Oceans and the Gulf of Mexico. Our team provides security service support operations such as, but not limited to, drafting, and reviewing policy memos, plans, SOPs, conducting inspections, access control, and manning the Security Help Desk needed to support USSOUTHCOM Headquarters in Miami Florida and its supporting facilities.

Washington Headquarters Services (WHS) / Joint Services Provider (JSP) Admin Support Services

The Joint Service Provider (JSP) is responsible for the design, development, implementation, management and operation of Pentagon-wide enterprise information technology infrastructure services (networking, operating systems, applications, databases, communications software/hardware, desktops) engineering support, information technology/management, continuity of operations and information assurance. The support was to provide administrative and human resource support including internal and external communications, internal management control program, and support for leadership support in a wide range of DoD information management initiatives.
